Corrigenda to: registered numbers of ammonite specimens on the
“Santonian fossils from the Upper Cretaceous Atokura Formation
in Kwanto Mountains, Japan, and their significances”
[Bulletin of Tokyo Gakugei University, Division of Natural Science 64 (2012) 143-152]

Masaki MATSUKAWA,* Ikuwo OBATA**

Department of Environmental Sciences

(Received for Publication; May 28, 2014)

It became clear that it overlapped with the registered numbers which the registered numbers used by Matsukawa and Obata (2012) was not managed properly, but used by Obata and Matsukawa (2011). Then, since the registered numbers used by Matsukawa and Obata (2012) is corrected as follows, it reports here.

p. 144-148, *Polyptychoceras* (*Polyptychoceras*) cf. *obstrictum* (Jimbo, 1894);

“TGUSE-MM 6005, 6006, 6007, 6008, 6009, 6010 and 6011” change to “TGUSE-MM 6253, 6254, 6255, 6256, 6257, 6258 and 6259”.
